POCKET GUIDE

RESPECT THIS COMPOUND

5MAPB an unscheduled empathogen similar in experience to MDMA. Overconsumption can cause dehydration, hyperthermia, and worse.

DON'T FUCK AROUND AND FIND OUT

Do Not Microdose

5MAPB releases your serotonin. You do not want to do this frequently. If you dose too low, you won't reach a roll. You may get stuck in a comeup for hours. Not the experience we're offering.

Do Not Exceed Dosage Window

The more you take, the warmer you get. The sweatier you get. The thirstier you get. Too much dehydration becomes serious. Possibly life threatening. Not a good time. Nothing to fiend here.

No "I can handle my alcohol" mentality.

duration: 5-7 hours

MDMA

Keep Cool

You will be warm.
You might be a little sweaty.
Try not to overheat.
Dance away.
Don't overdo it.

5MAPB

Stay Hydrated

You will be thirsty.
Have plenty of water available.
Have easy access to a bathroom.

Come Rested

It's best if you're fresh.

Occasional Experience Only

Wait over 3 months
between experiences.
NEVER dose more than once a month.

Best on an Empty Stomach

The longer it takes for your system to
process contents in your stomach,
the longer the onset.

No SSRIs - No MAOIs

Combining SSRIs with Empathogens
seriously increases the risk for
Serotonin Syndrome.
Could cause hospitalization. **Avoid!**

Chance of Difficult Comeup

Not most, but some people may
experience a disturbing jolting
moment in your comeup.
If you do, take a breath,
this will pass,
you will immerse into euphoria soon.

In order to reduce chances of a
difficult jolting comeup,
space out your dose,
take soft gels 10 minutes apart.
Let it ease in.

Not Medical Advice

Please be thoughtful.
Seek out better understanding.
Stay true to what works for you.
